NBN Trust Conference App

The NBN Trust (www.nbn.org.uk) is a charity that promotes and facilitates the collection, curation and sharing of data about the UK's wildlife, so that it can be used for all decisions that affect biodiversity e.g. government policy, conservation, education and planning applications.

We hold a two day conference every November attended by between 150 and 200 people. We are seeking ways to make the conference more environmentally friendly; one way is to reduce the number of printed conference programmes we produce. Therefore, we would like you to develop an app, for Android and iOS, that provides the information in the programme and more.

We would like an app that:

- Provides the schedule along with abstracts for the talks and speaker details and information about the workshops
- Provides a reminder for attendees of the workshops they have signed up for
- Enables attendees to direct message other attendees at the conference
- Submit questions for a technical knowledge transfer session
- Allows attendees to sign up for the evening meal on the first night
- Vote in the Annual General Meeting
- Must keep attendees data secure

Each group should have one nominated contact who collates any questions from their group and emails them to me once a week at j.judge@nbn.org.uk
